Why Choose Tumbled Natural Stone Pavers?

- **Color Never Fades**
- **Durable** – Tumbled stone is stronger and more durable than concrete pavers or chiseled natural stone. Low maintenance requirements reduces ongoing cost
- **Safe** – Tumbled natural stone is non-skid even when wet
- **Stays Cool to Touch**
- **Lasting** – Continual wetting will not degrade the surface or wash out the colors
- **Does Not Crack or Break in Freezing Temperatures**
- **Practical** – All of our pavers have matching bullnose for pool coping and steps
- **Sand-Set Application** – Our standard 1" patio paver is perfect for any pool deck or patio in a sand-set application
- **Increases Property Value** – The timeless beauty of tumbled natural stone adds enduring visual appeal and value to any property
- **Available in Eight Colors**
- **Available Paver Sizes from 4" x 8" up to 24" x 24"**

Why Choose Olympic Stone?

- **Superior Quality**
- **Credibility** – Olympic has been providing natural stone pavers for over seven years with thousands of completed projects and satisfied customers
- **Dedication** – Our dedication to our clients is our purpose
- **Huge Inventory with Strategically Placed National Distribution Centers**
- **Consistent Dimensions and Thicknesses**
- **Strategically Implemented Packaging Methods** - Designed to minimize breakage
- **Large Variety** – Olympic is constantly adding new and exciting product lines
- **Fabrication Available**

Color Selections

Olympic Gold

Tumbled Travertine

Olympic Gold exemplifies the rustic design concept. With a wide range of color variation, this product is sure to draw attention.

Olympic Oxford

Tumbled Travertine

The staple tone in Olympic Oxford is beige; however, its color ranges from a Gold tone all the way to a light Walnut.

Olympic Walnut

Tumbled Travertine

Olympic Walnut is a chocolate colored travertine, which has a wide range of brown tones.

Answers

to common questions

Question: What is the difference between marble and travertine?

Answer: They are both natural stones. Travertine, which is generally more pitted and varied in color, is often referred to as giving an "old world, rustic, Mediterranean or antique" look. Marble, which generally has less pitting and a more consistent surface, is often described as giving a more elegant or contemporary look.

Question: How are natural stone pavers installed? Can natural stone pavers be sand-set?

Answer: They are sand-set, just like any other paver. The installer should follow the basic ICPI applications and processes that are appropriate for the local conditions.

Question: Can you place natural stone over an existing deck?

Answer: Yes. And you can sand-set it.

Question: Is it hot like other decks?

Answer: No. Actually, just the opposite, natural stone tends to stay cool even on the hottest days.

Question: Does natural stone stain?

Answer: It doesn't, if you rinse it off in a reasonable period of time. However, if the stone gets a stain, there are products that will clean it.

Question: Does the color fade?

Answer: Natural stone does not fade, unlike traditional cool decks or other man made pavers.

Question: How hard is it to clean?

Answer: For the most part, rinsing the deck on a regular basis is more than enough to keep it clean.

Question: What about sealing?

Answer: It is a personal choice to seal or not. Applying a color enhancer is an additional option. If you would like it sealed, Olympic offers a product which is properly suited for natural stone.

Question: Is it slippery when wet?

Answer: No. In fact, Olympic has had its product line tested and all materials meet or exceed Miami / Dade slip coefficient requirements.

Question: Can you use travertine in a driveway?

Answer: Yes. Olympic Stone carries a variety of products for driveways including a 2 ¼" and 1 ½" travertine line as well as granite. To avoid cracking, it is imperative to select a stone with the appropriate finish and thickness.

Question: How does the price of natural stone compare to other pavers?

Answer: There is no comparison. The elegance, beauty, and value of natural stone far exceed any additional cost.
