You can't design a building without a landscape.
 They aren't separate things. One always lives with the other.

Uni Eco-Stone™ Nature made stronger.

Uni Eco-Stone™ makes efficient use of land that might not otherwise be developed because of stormwater retention and limitations on the impervious area allowed on a site. This paver gives the designer a tool to minimize the environment's impact on land development. Made with the same strength, durability and aesthetics as solid concrete pavers, Uni Eco-Stone™ is a natural way to handle storm water runoff, conserve rainwater, recharge groundwater storage, improve water quality and mitigate pollution on surrounding surface waters.

Front: Eco-Stones™ and a contrasting Holland-Stone™ border make an impressive entrance. **Below:** Eco-Stone™ walkway with Holland-Stone™ borders overlooking water. **Left:** Eco-Stone™ front drive with Holland-Stone™ border complements a lovely garden.

UNI ECO-STONE™

4.5 x 9 inches (115 x 230 mm)
 3 1/8 inches (80 mm) thick
 Approx. 3.55 pavers per sq. ft.

Void area per square foot = 12.18%

The PaverSystems Quality Assurance™ Our pavers are designed to the highest standards for durability, color and texture. All PaverSystems™ pavers comply with or surpass ASTM C-936-01 standards.

Pavers are manufactured from mined materials and colors will vary from batch to batch. Colors printed here are reproduced as accurately as possible; however, every paver is unique and may not exactly match what you see. For the best idea of actual color and texture, ask your installer for samples of your favorite pavers.
